

# Art and Sound Creator

## Connection to Source

Brigitte Krüger

- Sound is Frequency, Light and Information.
- Light Language is a multi-dimensional language that is understood on a soul level and works beyond the mind. It speaks directly to your DNA.

### Paintings

My paintings are a reflection of the collective energy. While painting I am channeling information through sound and light language. This information has a vibrational message for the viewer. It can be experienced on different levels, depending on where the information/healing for each individual is needed.

### Sound Healing

In a Sound Healing session I use different instruments (Gong, Singing Bowl etc.) as well as my voice (channeled tones and Light Language) to open the space for healing information. This can lead to deep transformation often followed by big shifts in your personal life.

### MP3

On request I can also create a customized recording with channeled sounds and „Light Language“ to support you on your life path.
